REC_DS using C_Week 7_COD_Question 2

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Priya is developing a simple student management system. She wants to store roll numbers in a hash table using Linear Probing, and later search for specific roll numbers to check if they exist.

Implement a hash table using linear probing with the following operations:

Insert all roll numbers into the hash table. For a list of query roll numbers, print "Value x: Found" or "Value x: Not Found" depending on whether it exists in the table.

Input Format

The first line contains two integers, n and table_size — the number of roll numbers to insert and the size of the hash table.

The second line contains n space-separated integers — the roll numbers to insert.

The third line contains an integer q — the number of queries.

The fourth line contains q space-separated integers — the roll numbers to search for.

Output Format

The output print q lines — for each query value x, print: "Value x: Found" or "Value x: Not Found"

Refer to the sample output for formatting specifications.

```
Sample Test Case
```

```
Input: 5 10
21 31 41 51 61
3
31 60 51
Output: Value 31: Found
Value 60: Not Found
Value 51: Found
Answer
#include <stdio.h>
#define MAX 100
void initializeTable(int table[], int size)
  for(int i=0;i<size;i++)
     table[i] = -1:
}
int linearProbe(int table[], int size, int num)
   int index = num&size;
  int start = index;
  while(table[index] != -1)
```

```
index = (index+1)%size;
     if(index == start)
        return -1;
   return index;
}
void insertIntoHashTable(int table[], int size, int arr[], int n)
   for(int i=0;i<n;i++)
     int index = linearProbe(table,size,arr[i]);
    if(index != -1)
       table[index] = arr[i]
int searchInHashTable(int table[], int size, int num)
   int index = num&size;
   int start = index;
   while(table[index] != -1)
     if(table[index] == num)
        return 1;
    index = (index+1)%size;
     if(index == start)
        break;
   return 0;
int main() {
   int n, table_size;
   scanf("%d %d", &n, &table_size);
   int arr[MAX], table[MAX];
   for (int i = 0; i < n; i++)
   o, , < 11, 1++)
scanf("%d", &arr[i]);
initializeTable(table, table_size);
   insertIntoHashTable(table, table_size, arr, n);
```

241501069

247507069

241501069

```
int q, x;
scanf("%d", &q);
for (int i = 0; i < q; i++) {
    scanf("%d", &x);
    if (searchInHashTable(table, table_size, x))
        printf("Value %d: Found\n", x);
    else
        printf("Value %d: Not Found\n", x);
}

return 0;
}
Status: Correct

Marks: 10/10</pre>
